PROJECTS

Isguzar.az

Developed "isguzar.az", a job and service marketplace platform enabling both clients and service providers to register, post listings (jobs or services), apply to postings, and communicate via real-time chat, along with various additional features to enhance user interaction and engagement.

Link: https://isguzar.az

Melhem International Hospital

Designed and implemented a fully functional, user-centric dynamic website, enabling users to log in, register, and access comprehensive hospital-related services. Incorporated features for doctors to register and manage their profiles, appointment scheduling, service information, and patient resources.

Link: https://melhemhospital.com/

NN Servis

I developed a website for a company specializing in the repair of household appliances, including refrigerators, boilers, washing machines, and air conditioners. The site is designed to provide customers with information about the services offered and facilitate easy booking of repair services.

Link: https://nnservice.az/

Proweb Creative Agency

Modern corporate website developed using pure JavaScript, Bootstrap, and CSS, presenting company services, portfolio, blogs, news, and corporate content in a responsive layout.

Link: https://proweb.az/

Hertz Azerbaijan

Built a rent-a-car website presenting car rentals, airport transfers, regional transfers, chauffeur services, and tours with a responsive and intuitive design.

Link: https://hertz.org.az/

Melhem International Hospital Admin Panel

Created a robust, user-friendly admin panel for a dynamic website, enabling seamless management of all website content, including text, images, logos, and other media. Implemented features to ensure real-time updates, content moderation, and intuitive navigation, enhancing the website's flexibility and administrative efficiency.

my ChatApp

Developed a real-time chat app using Node.js, Socket.IO, and React.js. Focused on building smooth client-server communication, enabling users to login and register, send and receive messages instantly. Gained experience in WebSocket connections, event-driven architecture, and real-time data handling.
